

## **Environmental Policy – 2012**

**This document outlines the actions, obligations and approach that Radical Heating Solutions Ltd will undertake in order to minimize the effects of our operations on the environment.**

It is the Company's firm intention to ensure that the highest practicable standard of consideration is given to the Environmental impact of all the undertakings of Radical Heating Solutions Limited. The aim targeted by Radical Heating Solutions Limited is for sustainability i.e. that by utilising only adequate natural resources in the achievement of their undertakings it will not compromise the chances of others in the future from achieving theirs. The Company accepts in full its obligations to work to the requirements of all legislation and codes of good practice relating to waste, contamination, noise, pollution and the Environment in general.

Radical Heating Solutions Limited will ensure through its buying policy that products purchased will be from renewable sources. Should there be products available that possess similar qualities to a material used but with less environmental impact those products will be purchased in preference.

The effectiveness of the Company's Environmental Policy relies heavily on the cooperation of Company employees and the co-ordination/control of their activities as well as those organisations and persons engaged by the Company. Radical Heating Solutions Limited will ensure through its vigilance that all persons throughout the company together with others who are contracted, or whose services are utilised, adopt duties and the responsibility to do everything possible to protect the environment.

The Government Environmental Strategy to reduce, reuse and recycle will be considered at all locations that the Company undertakes its business and at each stage of projects from the tender stage to completion.

Apathy, neglect and disregard will not be accepted in the identification of Environmental solutions and the taking of positive action to achieve continual improvement on our Environmental impact.

Radical Heating Solutions Limited is committed to minimising the impact of its operations on the environment by undertaking the following measures, wherever possible.

Radical Heating Solutions Limited in particular, will try to ensure that they:

- Comply, with all the requirements of all Environmental legislation.
- Promote recycling and the use of recycled materials.
- Aim at reducing consumption of materials wherever possible, through the use of such items that have an inherent increased life span and/or may be recycled.
- Offer the client the option of designing energy efficient installations and try to advise the client in ways of managing energy wisely in all operations, looking at long-term savings in energy and not short-term costs.
- Minimise waste in all operations.
- Work with suppliers to minimise the impact of their operations on the environment through a quality purchasing policy, where possible.
- Protect visual amenity by careful siting of establishments and equipment to ensure continued enjoyment of accepted aesthetics.
